

V3.0

# LPK:

## Lift Position Kit

**The Device:**

Lift and Position Kit is a highly configurable device, specifically designed for larger pallets that allows one to locate only, lift only, or both lift and locate. This device mounts directly to the bottom of the conveyor T-slot. When locating, the position cylinders are capable of repeatable, positional accuracy within  $\pm .05\text{mm}$ .

**Basic Order of Operation:**

1. Pallet is conveyed to device.
2. Pallet is stopped directly over device by stop (not included)
3. For Lift Only: All four cylinders will lift pallet above belt
4. For Position Only: Diamond and round pin positioners will engage locating bushings for positional accuracy but will not lift
5. For Lift and Position: Lift cylinders and locating positioners will all engage simultaneously to lift and locate the pallet above the conveyor belt.
6. Once operation complete, lift and position cylinders will deactivate, disengaging from the pallet.
7. Pallet stop lowers
8. Pallet is conveyed out of work area

**Technical Specifications for Position Cylinder P-00660**

Pallet length minimum: 240mm\*  
 Pallet width minimum: 295mm\*  
 Pneumatic Ports: G1/8

**Part Number: LPK-(A)-(B)-(C)**

**A** = Pallet Width (Minimum 295mm\*)  
**B** = Pallet Length (Minimum 240mm\*)  
**C** = Kit Type: LP (Lift & Position), L (Lift Only), or P (Position Only)

\*We at Glide-Line pride ourselves on being flexible. Please do not hesitate to contact us for customized solutions outside of the listed size range.

**Technical Specifications for Lift Cylinder P-00265**

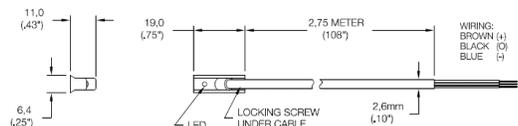

Lift range: 1.5mm above belt  
 Lift height fine adjustment range: +/- 10mm  
 Lift cylinder bore: 40mm  
 Lift capacity: 150 Lbs. @ 80 psi.  
 Pallet length minimum: 240mm\*  
 Pallet width minimum: 295mm\*  
 Pneumatic Ports: G1/8

**Recommended Lift Cylinder Sensor P-00265 (Manufacturer: Nason):**

SCP/P-00770 = Electronic Reed Switch, M8x1 3-Pin Male, PNP  
 SR/P-00771 = 5m Long M8 Female Locking Connector for SKP/SCP

**Recommended Position Cylinder Sensor P-00660 (Manufacturer: Asutec):**

SKS/P-00737 = Electronic T-slot Sensor, M8x1-S49, PNP

### LPK Variants

The LPK is available in three variants, designated by the last letter(s) in the part number (LP, L, P). LP indicates that the LPK includes lift and position. L indicates the LPK is only capable of lifting. P indicates the LPK is only capable of positioning
